Daniel - So sorry that you can't join us, but thank you for letting us know! If you would like to set up a call or tour our operation at a future time, please let us know.

Thank you!
Shannon

Subject: 10/18 Lifecycle Building Center event & workforce training program

Daniel - I am reaching out to invite you to Lifecycle Building Center's 10th annual fundraiser on Tuesday October 18th from 6-9pm at Georgia Tech's [Kendeda Building for Innovative Sustainable Design](#). This project achieved Living Building Challenge certification last year, and Lifecycle Building Center (LBC) helped provide many of the reclaimed materials used. More information about the event can be found at the link below.

lifecyclebuildingcenter.org/annual-fundraiser

If you are able to make it, we would love to acknowledge your presence at the event. EPA has been an instrumental partner for LBC since our founding in 2011, including several Brownfield assessment grants in 2015/2016, a Brownfield Cleanup grant in 2017 and a job training grant in 2019.

Through the job training grant we received through EPA, LBC has developed a workforce training program to provide deconstruction training to at-risk individuals. Our goal is to help trainees access living wage careers while simultaneously strengthening communities near LBC by incorporating reclaimed building materials into affordable housing projects. We have brought together over two dozen community partners to support this effort, and received significant support from Georgia Tech's Serve-Learn-Sustain program. A recent video with several of our coalition partners can be found below.

Regardless of whether or not you have capacity to attend our event, I'd love to set up a time to share more information about our training program. If you would be open to scheduling a

call or visiting LBC for a tour, please let me know.

Thank you!
